

- 11 Ema has done some calculations.

For each calculation, explain how you know the answer is wrong without working out the correct answer.

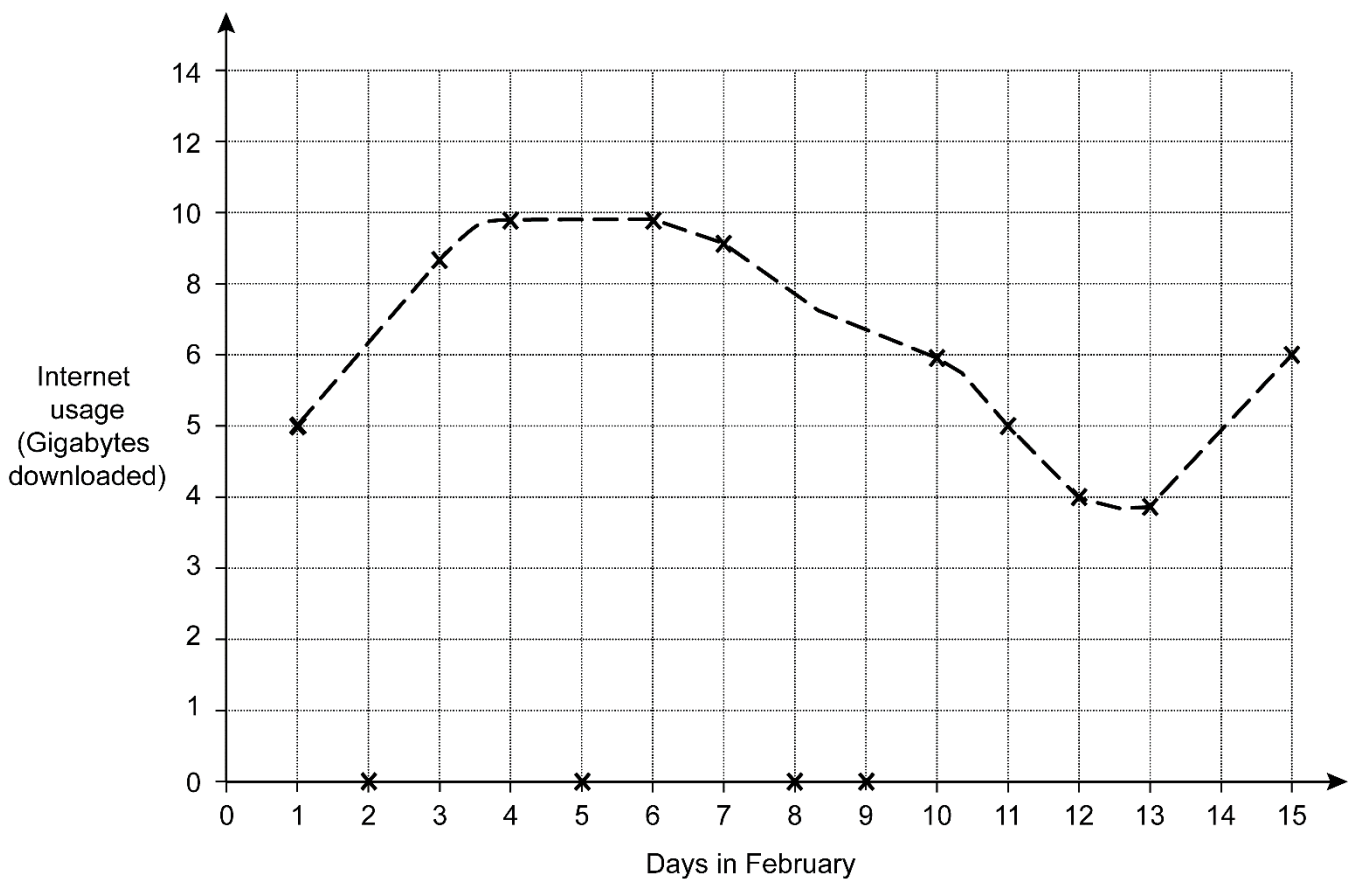

(a) $0.38 \times 0.26 = 0.827$

.....
 [1]

(b) $\frac{3}{4} + \frac{2}{3} = \frac{5}{7}$

.....
 [1]

- 12 Shinya's internet service provider gives him a graph of his internet usage in the first part of February.

State two reasons why this graph is misleading.

- 1
 2

[2]
